202046 - Audit Course - III									
Teaching Scheme	Credits	Examination Scheme							
-	-	-							
GUIDELINES FOR CONDUCTION OF AUDIT COURSE									

Faculty mentor shall be allotted for individual courses and he/she shall monitor the progress for successful accomplishment of the course. Such monitoring is necessary for ensuring that the concept of self learning is being pursued by the students 'in true letter and spirit'.

- If any course through Swayam/ NPTEL/ virtual platform is selected the minimum duration shall be of 8 weeks.
- However if any of the course duration is less than the desired (8 weeks) the mentor shall ensure that
 other activities in form of assignments, quizzes, group discussion etc. (allied with the course) for the
 balance duration should be undertaken.

In addition to credits courses, it is mandatory that there should be an audit course (non-credit course) from second year of Engineering. The student will be awarded grade as AP on successful completion of the audit course. The student may opt for any one of the audit courses in each semester. Such audit courses can help the student to get awareness of different issues which make an impact on human lives and enhance their skill sets to improve their employability. List of audit courses offered in the semester is provided in the curriculum. Students can choose one of the audit courses from the list of courses mentioned. Evaluation of the audit course will be done at institute level.

The student registered for audit course shall be awarded the grade AP and shall be included such grade in the Semester grade report for that course, provided student has the minimum attendance as prescribed by the Savitribai Phule Pune University and satisfactory in-semester performance and secured a passing grade in that audit course. No grade points are associated with this 'AP' grade and performance in these courses is not considered in the calculation of the performance indices SGPA and CGPA. Evaluation of the audit course will be done at institute level itself.

Selecting an Audit Course

List of Courses to be opted (Any one) under Audit Course III

- Technical English For Engineers
- Entrepreneurship Development
- Developing soft skills and personality
- Design Thinking
- · Foreign Language (preferably German/ Japanese)

Selecting an Audit Course List of Courses to be opted (Any one) under Audit Course IV

- Language & Mind Emotional Intelligence
- Advanced Foreign Language (preferably German/ Japanese)
- Human Behaviour
- Speaking Effectively
- Business Ethics
- Technical writing/ Research writing
- # The titles indicated above are subject to change in time to come and such an alteration (if any) should be brought to the notice of the BoS.

Using NPTEL Platform: (preferable)

NPTEL is an initiative by MHRD to enhance learning effectiveness in the field of technical

B. DEPARTMENT OF COMPUTER ENGINEERING

AC5-II: Professional Ethics and Etiquettes

Prerequisites: Business Communication Skill

Course Objectives:

- To learn importance of ethics and the rules of good behavior for today's most common social and business situations
- To acquire basic knowledge of ethics to make informed ethical decisions when confronted with problems in the working environment
- To develop an understanding towards business etiquettes and the proper etiquette practices for different business scenarios
- To learn the etiquette requirements for meetings, entertaining, telephone, email and Internet business interaction scenario

Course Outcomes:

On completion of the course, learners will be able to

CO1: Summarize the principles of proper courtesy as they are practiced in the workplace

CO2: Apply proper courtesy in different professional situations

CO3: Practice and apply appropriate etiquettes in the working environment and day to day life

CO4: Build proper practices personal and business communications of Ethics and Etiquettes

Course Contents

- Introduction to Ethics: Basics, Difference Between Morals, Ethics, and Laws, Engineering Ethics: Purpose of Engineering Ethics-Professional and Professionalism, Professional Roles to be played by an Engineer, Uses of Ethical Theories, Professional Ethics, Development of Ethics.
- Professional Ethics: IT Professional Ethics, Ethics in the Business World, Corporate Social Responsibility, Improving Corporate Ethics, Creating an Ethical Work Environment, Including Ethical Considerations in Decision Making, Ethics in Information Technology, Common Ethical issues for IT Users, Supporting the Ethical Practices of IT users.
- 3. Business Etiquette: ABC's of Etiquette, Developing a Culture of Excellence, The Role of Good Manners in Business, Enduring Words Making Introductions and Greeting People: Greeting Components, The Protocol of Shaking Hands, Introductions, Introductory Scenarios, Addressing Individuals Meeting and Board Room Protocol: Guidelines for Planning a Meeting, Guidelines for Attending a Meeting.
- 4. Professional Etiquette: Etiquette at Dining, Involuntary Awkward Actions, How to Network, Networking Etiquette, Public Relations Office(PRO)'s Etiquettes, Technology Etiquette: Phone Etiquette, Email Etiquette, Social Media Etiquette, Video Conferencing Etiquette, interview Etiquette, Dressing Etiquettes: for interview, offices and social functions.

C. DEPARTMENT OF INFORMATION TECHNOLOGY

Curriculum for Second Year of Information Technology (2019 Course), Savitribai Phule Pune University

Savitribai Phule Pune University, Pune Second Year Information Technology (2019 Course) 214450 (A): Mandatory Audit Course 3:

Ethics and Values in Information Technology

Teaching Scheme:	Credit Scheme:	Examination Scheme:
01hrs/week	Non Credit	Audit Course

Prerequisite Courses, if any:--

Course Objectives:

- To understand and implement the values and principles in the field of Information Technology.
- 2. To nurture honest and responsible professionals in Information Technology.
- To develop student's understanding about social/ professional ethical issues related to Information Technology.
- 4. To inculcate professional ethics in the field of IT.

Course Outcomes:

On completion of this course students will be able to-

- CO1: Adapt the global ethical principles and modern ethical issues.
- CO2: Apprehend ethics in the business relationships and practices of IT.
- CO3: Implement trustworthy computing to manage risk and security vulnerabilities.
- CO4: Analyse concerns of privacy, privacy rights in information-gathering practices in IT.

COURSE CONTENTS

Unit -I	An Overview of Ethics	03hrs

An overview of Ethics: Brief about ethics, Ethics in the Business World, Ethics in IT.

Ethics for IT professionals and IT users: IT professionals: Changing Professional Services, Professional Relationships, Codes of Ethics, awareness of IT malpractices, IT Users: Common Ethical Issues for IT Users, Supporting the Ethical Practices of IT Users.

ı	Mapping of Course Outcomes for	CO1, CO2	
ı	Unit I		
	Unit- II	Computer And Internet Crime	03hrs

Introduction: IT security incidents, Types of Exploits, Types of Perpetrators, Laws for Prosecuting, Computer Attacks, Implementing Trustworthy Computing, Risk and Vulnerability Assessment, Educating Employees, Contractors, and Part-Time Workers, Establishing a Security Policy

Privacy: The right of Privacy, Privacy Protection and the Law, Key Privacy and Anonymity Issues Identity Theft, Consumer Profiling, Treating Consumer Data Responsibility, Workplace Monitoring

Freedom of Expression: Defamation and Hate Speech, Key Issues, Controlling Access to Information on the Internet, Anonymity on the Internet, Corporate Biogging, Pornography

- Advanced Foreign Language (preferably German/ Japanese)
- Human Behaviour
- Speaking Effectively
- Business Ethics
- Technical writing/ Research writing

The titles indicated above are subject to change in time to come and such an alteration (if any) should be brought to the notice of the BoS.

Audit Courses									
402054A	Yoga Practices	402054B	Stress Management						
402055A	Managing Innovation	402055B	Operations Management						

List of Courses to be opted (Any one) under Audit Course

A. Yoga Practices

B. Stress Management

Note:-The title indicated above are subject to change in time to come and such an alteration (if any) should be brought to the notice of the BoS.

Using NPTEL Platform: (preferable)

NPTEL is an initiative by MHRD to enhance learning effectiveness in the field of technical education by developing curriculum based video courses and web based e-courses. The details of NPTEL courses are available on its official website www.nptel.ac.in

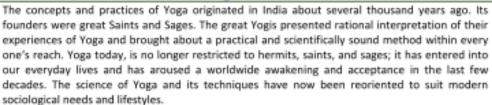

- Students can select any one of the courses mentioned above and has to register for the corresponding online course available on the NPTEL platform as an Audit course.
- Once the course is completed the student can appear for the examination as per the guidelines on the NPTEL portal.
- After clearing the examination successfully; student will be awarded with a certificate.

Assessment of an Audit Course

- The assessment of the course will be done at the institute level. The institute has to maintain
 the record of the various audit courses opted by the students. The audit course opted by the
 students could be interdisciplinary
- During the course students will be submitting the online assignments/report/course completion certificate etc. A copy of the same can be submitted as a part of term work for the corresponding Audit course.
- On the satisfactory submission of assignments/report/course completion certificate etc., the
 institute can mark as "Present" and the student will be awarded the grade AP on the marksheet.

B. DEPARTMENT OF COMPUTER ENGINEERING

AC4-IV: Yoga and Meditation

Yoga is one of the six systems of Vedic philosophy. The Yoga advocates certain restraints and observances, physical discipline, breathe regulations, restraining the sense organs, contemplation, meditation and Samadhi. The practice of Yoga prevents psychosomatic disorders and improves an individual's resistance and ability to endure stressful situations.

Course Objectives:

- To impart knowledge about the basic technique and practice of yoga, including instruction in breath control, meditation, and physical postures
- To gain an intellectual and theoretical understanding of the principles embodied in the Yoga Sutras, the Bhagavad-Gita, and other important texts and doctrines
- Relaxation and stress reduction ,Personal insight and self understanding, Personal empowerment, Gaining wisdom and spiritual discernment
- · Awakening the abilities or powers of the Super conscious mind

Course Outcomes:

On completion of the course, learner will be able to-

CO1: Understand philosophy and religion as well as daily life issues will be challenged and enhanced.

CO2: Enhances the immune system.

CO3: Intellectual and philosophical understanding of the theory of yoga and basic related Hindu scriptures will be developed.

CO4: Powers of concentration, focus, and awareness will be heightened.

Course Contents

- Meaning and definition of yoga Scope of Yoga Aims and Objectives of Yoga -Misconception about yoga.
- Ayurveda: an introduction to this system of health care derived from the Vedic tradition Anatomy and Physiology as they relate to Yoga
- 3. Yoga Philosophy and Psychology

Democracy, Election and Governance

Objectives:

- To introduce the students meaning of democracy and the role of the governance
- To help them understand the various approaches to the study of democracy and governance

Module 1 Democracy- Foundation and Dimensions

- Constitution of India
- b. Evolution of Democracy- Different Models
- c. Dimensions of Democracy- Social, Economic, and Political

Module 2 Decentralization

- a. Indian tradition of decentralization
- b. History of panchayat Raj institution in the lost independence period
- c. 73rd and 74th amendments
- d. Challenges of caste, gender, class, democracy and ethnicity

Module 3 Governance

- a. Meaning and concepts
- b. Government and governance
- c. Inclusion and exclusion

B. DEPARTMENT OF COMPUTER ENGINEERING

Curriculum for Third Year of Computer Engineering (2019 Course), Savitribai Phule Pune University

AC6-II Sustainable Energy Systems

Prerequisites: General awareness of environment and natural resources of energy

Course Objectives:

- · To understand the importance of sustainable energy systems development
- To create awareness about renewable energy sources and technologies
- To learn about adequate inputs on a variety of issues in harnessing renewable energy
- To recognize current and possible future role of renewable energy sources

Course Outcomes:

On completion of the course, learners will be able to

CO1: Comprehend the importance of Sustainable Energy Systems

CO2: Correlate the human population growth and its trend to the natural resource degradation and develop the awareness about his/her role towards Sustainable Energy Systems protection

CO3: Identify different types of natural resource pollution and control measures

CO4: Correlate the exploitation and utilization of conventional and non-conventional resources

Course Contents

- Wind Energy: Power in the Wind, Types of Wind Power Plants (WPPs), Components of WPPs, Working of WPPs, Siting of WPPs, Grid integration issues of WPPs.
- 2. Solar Pv and Thermal Systems: Solar Radiation, Radiation Measurement, Solar Thermal Power Plant, Central Receiver Power Plants, Solar Ponds, Thermal Energy storage system with PCM, Solar Photovoltaic systems: Basic Principle of SPV conversion, Types of PV Systems, Types of Solar Cells, Photovoltaic cell concepts: Cell, module, array, PV Module I-V Characteristics, Efficiency and Quality of the Cell, series and parallel connections, maximum power point tracking, Applications.
- Other Energy Sources: Tidal Energy: Energy from the tides, Barrage and Non Barrage
 Tidal power systems. Wave Energy: Energy from waves, wave power devices.
 Ocean Thermal Energy Conversion (OTEC), Hydrogen Production and Storage. Fuel cell:
 Principle of working, various types, construction and applications. Energy Storage System,
 Hybrid Energy Systems.

AC3-III: Environmental Studies

Course Objectives:

- 1. Understanding the importance of ecological balance for sustainable development.
- 2. Understanding the impacts of developmental activities and mitigation measures.
- Understand and realize the multi-disciplinary nature of the environment, its components, and inter-relationship between man and environment
- Understand the relevance and importance of the natural resources in the sustenance of life on earth and living standard

Course Outcomes:

On completion of the course, learner will be able to-

CO1: Comprehend the importance of ecosystem and biodiversity

CO2: Correlate the human population growth and its trend to the environmental degradation and develop the awareness about his/her role towards environmental protection and prevention

CO3: Identify different types of environmental pollution and control measures

CO4: Correlate the exploitation and utilization of conventional and non-conventional resources

Course Contents

- Natural Resources: Introduction, Renewable and non-renewable, Forest, water, mineral, food, energy and land resources, Individual and conservation of resources, Equitable use of resources.
- Ecosystems: Concept, Structure, Function, Energy flow, Ecological succession, Forest, grassland, desert and aquatic ecosystems - Introduction, characteristic features, structure and function.
- Biodiversity: Genetic, Species and ecological diversity, Bio Geographical classification of India, Value and hot spots, Biodiversity at global, national and local levels, India as megabiodiversity nation, Threats to biodiversity, Endangered and endemic species of India, Conservation of Biodiversity, Endangered and endemic species, Conservation of biodiversity.
- Pollution: Definition, Causes, effects and control measures of the pollution Air, soil, Noise, Water, Marine and Thermal and Nuclear Pollution, Solid waste management, Role of Individual in Prevention of Pollution, Pollution #Exemplar/Case Studies, Disaster management

C. DEPARTMENT OF INFORMATION TECHNOLOGY

Curriculum for Second Year of Information Technology (2019 Course), Savitribai Phule Pune University

Savitribai Phule Pune University, Pune Second Year Information Technology (2019Course)

e-Waste Management and Pollution Control

Teaching Scheme:	Credit Scheme:	Examination Scheme:		
01hrs/week	Non Credit course	Audit Course		

Prerequisite Courses: if any: --

Course Objectives:

- To make the students aware about importance of environmental study.
- To study impact of professional engineering products in societal contexts.
- 3. To understand impact of professional engineering products in environmental contexts.
- To learn e-waste management and e-waste recycling process.
- To understand causes, effects and control measures of environment pollutions.
- 6. To learn impact of environment controlling methods on human health.

Course Outcomes:

On completion of the course, learner will be able to --

CO1: Discuss various types of e-waste sources.

CO2: Understand impact of various e-wastes.

CO3: Identify characteristics of various e-Waste pollutants.

CO4: Understand process of e-Waste Recycling and relevant technologies.

CO5: Discuss causes, effects and control measures of different environment pollution.

CO6: Demonstrate Safe methods for disposal of e-waste and controlling the pollution.

COURSE CONTENTS

e-waste Overview: What is e-waste, E-waste growth- An overview, hazards of e-waste Sources		
of e-wastes: Discarded computers, televisions. VCRs. stereos, copiers, fax machines, electric		
lamps, cell phones, audio equipment and batteries if improperly disposed.		

E-Waste Overview and Sources

Unit II	Impact of various e-wastes	02 hrs
Outcomes for Unit I		
Mapping of Course	CO1	

Solder in printed circuit boards, glass panels and monitors, Chip resistors and semiconductors, Relays and switches, Printed Circuit Boards, Cabling and computer housing, Plastic housing of electronic equipment and circuit boards, Front panel of CRTs, Motherboards.

Manning of Course CO2

Unit I

02 hrs

Savitribai Phule Pune University, Pune Third Year Information Technology (2019 Course) Mandatory Audit Course 6 314459 (A): Green and Unconventional Energy Teaching Scheme: Examination Scheme:

Teaching Scheme: Credit Scheme: Examination Scheme:
Theory (TH): 1 hrs/week
Tutorial(TUT): 3 hrs/week
(Assignments and Self-study)

Credit Scheme: Examination Scheme:

Audit Course

Prerequisite Courses, if any:

Course Objectives:

- To know the importance of the energy and the basic infrastructures for the economic development of the country.
- To know about the most important renewable energy resources and the technologies for harnessing these resources within the framework of a broad range of simple to state- of -the-art energy systems.
- To understand the application of non-conventional energy technologies.

Course Outcomes:

On completion of the course, students will be able to-

CO1: List and explain the main sources of energy and their primary applications in the India, and theworld.

CO2: Describe the challenges and problems associated with the use of various energy sources and itsconservation.

CO3: List and describe the primary renewable energy resources and technologies.

CO4: Collect and organize information on renewable energy technologies as a basis for further analysis and evaluation.

COURSE CONTENTS					
Unit I UNCONVENTIONAL ENERGY STUDIES (04 hrs)					
Various Non-Conventional energy sources, Need, Availability, Classification, Relative merits & demerits, Global energy scenario, Indian energy scenario, Energy Storage, Distribution and Conservation					
Mapping of Course Outcomes CO1, CO2					
for Unit I					
Unit II SOLAR and WIND ENERGY (04 hrs)					

D. DEPARTMENT OF APPLIED SCIENCE AND GENERAL ENGINEERING

4.	Demonstration of Drilling machine					
	Demonstration on construction of Radial drilling machine, Tool holding devices,					
	Concept of speed, feed and depth of cut.					
5.	Demonstration on Milling machine					
	Demonstration on construction, table movements, indexing and tooling of milling					
	machine.					
6.	Demonstration of Shaper/Grinding machine (Any one)					
	Shaper: Crank and slotted link mechanism, Work feed mechanism					
7	Grinding: Surface grinder/Cylindrical grinding machine, Mounting of grinding wheel					
7.	Term work includes one job of Carpentry Introduction to wood working, kinds of woods, hand tools & machines, Types of joints,					
	wood turning. Pattern making, types of patterns and its allowances.					
8.	Term work to include one job involving fitting to size, male-female fitting with					
0.	drilling and tapping operation on Mild Steel plate;					
	Introduction to marking, cutting and sawing, sizing of metal, shearing, Concept of fits					
	and interchangeability, selection of datum and measurements.					
9.	Term work to include one utility job preferably using sheet metal (e.g. Tray, Funnel					
	etc.) with riveting/welding/brazing/soldering (at least one temporary and one Permanent					
	joint either using resistance welding/Arc welding);					
	Introduction to sheet metal operations: punching, blanking, bending, drawing.					
10.	Prepare a Layout of Workshop					
	To prepare a work shop layout.					
11.	Collection of information about safety norms in any one of the following type of					
	industry:Metalworking/Chemical/Cement/Pharmaceuticals/Defense/Atomic					
	energy/Aerospace /Marine/Construction/Railway etc.					
	Text Books					
	K. C., (2010), "Mechanical Workshop Practice, Prentice Hall Publication, New Delhi					
2. Hazra	and Chaudhary, Workshop Technology-I & II, Media promoters & Publisher Pvt. Ltd.					
TH:02 H	101007: Environmental Studies-I rs./week (Mandatory Non-Credit Course)					
Course O						
	explain the concepts and strategies related to sustainable development and various					
	mponents of environment.					
2. To	To examine biotic and abiotic factors within an ecosystem, to identify food chains, webs, as					
we	well as energy flow and relationships.					
3. To	 To identify and analyze various conservation methods and their effectiveness in relation to 					
	renewable and nonrenewable natural resources.					
4. To	4. To gain an understanding of the value of biodiversity and current efforts to conserve					
	biodiversity on national and local scale.					
	utcomes:On completion of the course, learner will be able to-					
	CO1:Demonstrate an integrative approach to environmental issues with a focus on sustainability.					
	CO2: Explain and identify the role of the organism in energy transfers in different ecosystems.					
	CO3: Distinguish between and provide examples of renewable and nonrenewable resources &					
	analyze personal consumption of resources.					
	ntify key threats to biodiversity and develop appropriate policy options for conserving					
biodiversit	ty in different settings.					

Evaluation and Continuous Assessment:

It is recommended that the all activities are to be record and regularly, regular assessment of work to be done and proper documents are to be maintained at college end by both students as well as mentor (you may call it PBL work book).

Continuous Assessment Sheet (CAS) is to be maintained by all mentors/department and institutes. Recommended parameters for assessment, evaluation and weightage:

- Idea Inception (5%)
- Outcomes of PBL/ Problem Solving Skills/ Solution provided/ Final product (50%) (Individual assessment and team assessment)
- Documentation (Gathering requirements, design & modeling, implementation/execution, use of technology and final report, other documents) (25%)
- Demonstration (Presentation, User Interface, Usability etc) (10%)
- Contest Participation/ publication (5%)
- Awareness /Consideration of -Environment/ Social /Ethics/ Safety measures/Legal aspects (5%)

PBL workbook will serve the purpose and facilitate the job of students, mentorand project coordinator. This workbook will reflect accountability, punctuality, technical writing ability and work flow of the work undertaken.

101014: Environmental Studies-II

TH: 02 Hr/week Mandatory Non-Credit Course

Course Objectives:

- To provide a comprehensive overview of environmental pollution and the science and technology associated with the monitoring and control.
- To understand the evolution of environmental policies and laws.
- To explain the concepts behind the interrelations between environment and the development.
- To examine a range of environmental issues in the field, and relate these to scientific theory.

Course Outcomes: On completion of the course, learner will be able to-

CO1: Have an understanding of environmental pollution and the science behind those problems and potential solutions.

CO2: Have knowledge of various acts and laws and will be able to identify the industries that are violating these rules.

CO3: Assess the impact of ever increasing human population on the biosphere: social, economic issues and role of humans in conservation of natural resources.

CO4: Learn skills required to research and analyze environmental issues scientifically and learn how to use those skills in applied situations such as careers that may involve environmental problems and/or issues.
